Polycom-HI

PROCESSING AID AND MODIFIER FOR PVC APPLICATION

Key Advantages:-

- Polycom-HI replaces acrylic processing aid and acrylic impact modifier both used in formulation and gives better processing with same impact replacing impact modifier.
- Polycom-HI maintains existing strength and provides better homogeneity.
- Polycom - HI promotes fusion speed and increases productivity.
- Reduces Gelation time, maintaining fusion torque.
- Polycom-HI improves Melt Rheology
- Provides better surface finish
- Can be used in higher dosage without affecting the ampere load.
- Using Polycom-HI, dosage of Calcium Carbonate can be increased.

DOSAGES

POLYCOM-HI can be used from dosage of 0.5 to 5 PHR keeping the usual formulation same and replacing existing processing aid and impact modifier both.

*Above properties may vary plant to plant, processing skills and raw material used by the manufacturer.
